VIVITRO LABS EXPANDS LABORATORY OPERATIONS FOR HEART VALVE TESTING AND DEVICES

Victoria B.C. April 20, 2010 – Meeting the growing demand for heart valve testing and products, ViVitro Labs, Inc. is pleased to announce the expansion of its laboratory testing operations. Fully equipped and compliant with the most stringent industry requirements, this expansion significantly increases the scope of testing offered by ViVitro Labs, poising the company for future growth.

The expanded ViVitro Labs capabilities are in compliance with GLP (General Laboratory Practice) requirements, enabling the company to conduct regulatory testing in a fully equipped laboratory environment. Offering Hydrodynamic Assessment and Durability testing utilizing equipment manufactured by our own ISO 13485 compliant facility, ViVitro now enjoys virtually unlimited abilities to determine performance and provide analysis for FDA and ISO5840 requirements.

“I highly recommend the services, technical support, and test equipment from ViVitro Labs, Inc. to anyone needing heart valve device testing capabilities,” said R. E. Phillips, Ph.D., Partner and Vice President of Technology BioStable Science & Engineering, Inc. “I have had personal experience with ViVitro for over fifteen years and found their knowledge of device test requirements and their testing equipment to be superb. Their recent expanded emphasis on test equipment/software improvement and methods of device testing only serve to strengthen their place in this focused market for heart valve testing.”

The ViVitro staff actively participates in the American Association of Medical Instruments (AAMI) and International Organization for Standardization (ISO) committees. ViVitro personnel have expertise that includes 20 years of heart valve regulatory testing; including verification and protocols to support regulatory submissions, in addition to a variety of testing methods for all types of research efforts.

About ViVitro Labs

ViVitro Labs Inc. offers industry leading prosthetic heart valve test equipment and related testing and consulting services.

ViVitro is a known and trusted source of quality products and services providing 25 years of service assisting its clients to complete successful testing and regulatory quality compliance.

Our vision is to empower our clients to complete world-leading research, develop high quality, innovative products and enable them to demonstrate regulatory compliance and manufacture them reliably. ViVitro Labs handles custom product configuration and services for many of its clients.
